What is the Performance Fit Option?

The Performance Fit option takes the main body cushion of ½" Open Cell Air Management and replaces it with ¼" Poron High Impact Protection. The top shoulder of the main body cushion has an added

½" air management cushion. The results are the best of both foams, creating a lightweight, high-impact absorbing Performance Fit shoulder pad.

Performance Fit Option

- ¼" Poron Main Body Cushion.
- ½" Air Management cushion integrated into the shoulder area.
- Memory Foam with sewn Performance Stitching.

What is the Pro-Motion Option?

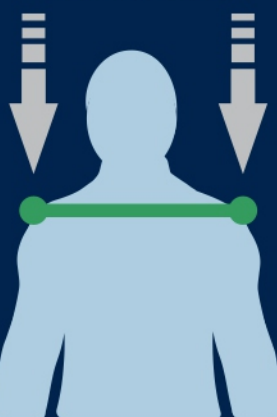

The Pro Motion option removes the lockdown back straps and locked in front closure of the shoulder pad, and swivels them. This Option allows each side of the shoulder pad to work independently, creating a more significant range of motion for the athlete.

Pro-Motion Option.

- Swivel assembly installed in front and back of the main arch.
- Split/swivel drop back plate complements swivel arch.
- Allows for greater mobility and reach.

Sizing Guide

For best fit measure from tip to tip.

Shoulder Measurement	Size
16 - 17"	XS
17 - 18"	S
18 - 19"	M
19 - 20"	L
20 - 21"	XL

WHY CHOOSE PRO GEAR

Pro Gear's owners and design team have more than 30 years of experience designing and custom building the highest quality football shoulder pads and accessories. At Pro Gear, we are focused on protection, mobility, and fit. Our Performance Fit design follows the natural contour of the shoulders and allows the pad to sit down for a more natural feeling fit. The design team at Pro Gear has researched foam and Impact absorbing material quality over the years and has determined we use the highest quality materials available to accommodate our Air Management design, offering the athlete the best protection. We use only the highest American-made construction materials throughout our hands-on building process-this attention to detail results in the most refined custom and non-custom football equipment available.
